

# MARYNA PYLYPCHENKO

SOFTWARE DEVELOPER

## WORK EXPERIENCE

**Full-stack Developer** Nov 2022  
till now

*E'Mind Tek Inc. Vancouver, Canada*

- Technologies: REST API, SDK biometry, DevExpress
- Developing software for an intelligent locker project that includes an RFID reader, biometric sensors, and fingerprint scanning for enhanced security and traceability. My responsibilities include integrating the hardware components with the software, developing and maintaining REST API endpoints, and ensuring system reliability. Additionally, I am collaborating with a team of engineers to troubleshoot issues and optimize performance.
- Tools: : Visual Studio, Google Meets, MongoDB , Microsoft Azure

**Intermediate Front End Developer** Dec 2021  
Feb 2023

*PayProGlobal, Lviv, Ukraine*

- Technologies: jQuery, Vue.js
- As a software developer, I implemented 100+ website changes to improve user flow and features. Using jQuery and Vue.js, I created interactive front-end components that increased engagement. Collaborating with cross-functional teams, I ensured changes were delivered on time. Resulting in a more intuitive platform with increased engagement and decreased support inquiries.
- Tools: : Visual Studio, Slack, BrowserStack

**Frontend developer** Aug 2020  
Dec 2021

*Softemy, Kyiv, Ukraine*

- Technologies: React, Redux, HTML, and CSS
- Project: application
- Developed applications using React and Redux, which saved users 5+ hours of time by managing the state effectively. Using modern JS frameworks, HTML, and CSS, I created user interfaces that improved user satisfaction. I also enhanced web application functionality and user experience by debugging and refining code.
- Tools: : Visual Studio, Slack, Git

**Front End Contractor** Mar 2019  
Aug 2020

*Upwork, Freelance*

- Technologies: React, Redux, HTML, and CSS
- As a web developer, I built cross-browser compatible and accessibility compliant websites based on specifications. I produced multiple visual elements and React JS components for various web applications by translating UI/UX design wireframes into JavaScript code. Working closely with agile teams of 10+ members, I delivered solutions for clients in an Agile environment. Through my efforts, clients received high-quality deliverables that were visually appealing, user-friendly, and delivered on-time within the Agile framework.
- Tools: : Visual Studio, Slack, Git

## CONTACT ME
